

KARTHICK SELVAM S

Java Developer | Backend Developer

+91 6381946509 | karthick4763@gmail.com | Tirunelveli, Tamil Nadu

CAREER OBJECTIVE

Motivated Java Developer with hands-on experience in backend development and full-stack web applications, seeking to build and maintain impactful software solutions. Experienced in developing scalable, performance-oriented applications using Java, Spring Boot, and REST API architecture. Skilled in applying Object-Oriented Programming principles and implementing database-driven systems. Strong written and spoken English proficiency with the ability to communicate technical concepts clearly and support collaborative problem-solving across teams.

TECHNICAL SKILLS

Backend Development: Java, Spring Boot, Spring Data JPA, Hibernate, REST API Development, Layered Architecture

Web Technologies: HTML5, CSS3, JavaScript (Basics), Thymeleaf

Database: H2 Database, SQL, JDBC

Programming: Java, C, C++

Concepts: Object-Oriented Programming, Exception Handling, File Handling, Data Structures

Version Control: Git, GitHub

Communication: English Proficiency — Written & Spoken | Tamil

PROJECTS

Courier Management System — Spring Boot Web Application

2026

Java · Spring Boot · Spring Data JPA · Hibernate · REST API · H2 Database · Thymeleaf

- Developed a full-stack Courier Management System using Java Spring Boot to automate courier booking, shipment tracking, employee assignment, and delivery management.
- Implemented role-based authentication for Admin, Employee, and Customer users; designed RESTful APIs with Spring Data JPA and Hibernate for efficient database operations and data persistence.
- Built automated courier assignment based on destination pincode, integrated H2 Database for secure data storage, and generated role-specific dashboards and daily reports using Thymeleaf.

Payslip Generation System — C++ OOP Application

2025

C++ · Object-Oriented Programming · File Handling · Exception Handling

- Developed a payroll management system using C++ and OOP concepts to automate employee salary calculation and payslip generation for Regular and Contract employees.
- Implemented Inheritance, Polymorphism, Encapsulation, and Abstraction with role-based authentication; utilized File Handling for persistent employee record storage across sessions.
- Applied Exception Handling mechanisms to validate inputs and prevent runtime errors, generating dynamic payslips with customized salary calculations based on employee type.

ACHIEVEMENTS

- Solved 1,600+ problems on Skillrack — consistent practice in data structures and algorithms
- Solved 100+ problems on LeetCode — competitive algorithmic problem-solving

EDUCATION

National Engineering College, Kovilpatti — B.E. Computer Science & Engineering
8.03

2024 – 2028 | CGPA:

Languages: English (Spoken & Written), Tamil
